

# Going Shopping

1. You are going shopping and have £15 to spend.
2. Each word used will cost you 50p.
3. Diagrams and pictures are FREE!
4. Write down everything you need to know about a topic you have been studying onto a piece of lined paper.

**Have a go.... Here's some information... can you reduce it and spend only £5?**

The moon is the easiest celestial object to find in the night sky — when it's there. Moon phases and the moon's orbit are a mystery to many. Because it takes 27.3 days both to rotate on its axis *and* to orbit Earth, the Moon always shows us the same face.

We see the Moon because of reflected sunlight. How much of it we see depends on its position in relation to Earth and the Sun.
